Releases

Core API CLI Bundler TAO WRY create-tauri-app

View releases on GitHub

▼ 2.0.0-alpha.16

New Features

- `c085adda` (#8009) Added `set_progress_bar` to `Window`.
- `c1ec0f15` (#7933) Added `Window::set_always_on_bottom` and the `always_on_bottom` option when creating a window.
- `880266a7` (#8031) Bump the MSRV to 1.70.
- `ed32257d` (#7794) On Windows, add `Effect::Tabbed`, `Effect::TabbedDark` and `Effect::TabbedLight` effects.

Enhancements

- `46dcb941` (#8006) Include mobile on docs.rs targets.

What's Changed

- `fb10b879` (#8039) Added the `app` plugin back into core.
- `c9a9246c` (#8007) Added the `window` plugin back into core.

Dependencies

- Upgraded to `tauri-runtime@1.0.0-alpha.3`
- Upgraded to `tauri-runtime-wry@1.0.0-alpha.4`
- Upgraded to `tauri-utils@2.0.0-alpha.9`
- Upgraded to `tauri-build@2.0.0-alpha.10`
- Upgraded to `tauri-macros@2.0.0-alpha.9`

Breaking Changes

- `a63e71f9` (#7942) The initialization script for `Builder::invoke_system` now must initialize the `window.__TAURI_INTERNALS__.postMessage` function instead of `window.__TAURI_POST_MESSAGE__`.

- `12b8d18b` (#7875) - Removed `tauri::path::Error` and added its variants to `tauri::Error`

  - Removed `tauri::path::Result` and `tauri::plugin::Result` aliases, you should use `tauri::Result` or your own `Result` type.

- `8b166e9b` (#7949) Changed `TAURI_AUTOMATION` to `TAURI_WEBVIEW_AUTOMATION`

- `2558fab8` (#7939) This release contains a number of breaking changes to improve the consistency of tauri internals and the public facing APIs and simplifying the types where applicable:

  - Removed `EventHandler` type.
  - Added `EventId` type
  - Changed `Manager::listen_global` and `Window::listen` to return the new `EventId` type instead of `EventHandler`.
  - Removed the return type of `Manager::once_global` and `Window::once`
  - Changed `Manager::unlisten` and `Window::unlisten` to take he new `EventId` type.
  - Added `tauri::scope::ScopeEventId`
  - Changed `FsScope::listen` to return the new `ScopeEventId` instead of `Uuid`.
  - Added `FsScope::unlisten`
