The jQuery Plugin Registry is in read-only mode.
New plugin releases will not be processed.

We recommend moving to npm, using "jquery-plugin (https://www.npmjs.org/browse/keyword/jquery-plugin)" as the keyword in your package.json. The npm blog has instructions for publishing your plugin to npm (https://blog.npmjs.org/post/111475741445/publishing-your-jquery-plugin-to-npm-the-quick).
